PUBLIC HEALTH NOTICE

June 12, 2020

The Utah Department of Health has approved a request for the Township of Bluff and Mexican Hat area to be advanced from Orange phase to Yellow phase of Governor Herbert's "Utah Leads Together Plan."

San Juan Public Health officially requested that Bluff township and the Mexican Hat areas of San Juan County join the rest of the non-tribal areas of San Juan County in the Governor's Yellow Risk Guidelines. We also recommended that both areas remain tied to the same risk level as the City of Blanding moving forward, unless future data suggests otherwise.

San Juan Public Health's request was based on a review of existing disease transmission data which showed no evidence that persons residing in the non-tribal areas of Bluff or Mexican Hat have experienced any increased risk of COVID-19 spread when compared to the Blanding area.

We continue to encourage Utah residents living on tribal lands within San Juan County to follow all tribal health directives.

Effective Date: June 13, 2020

Kirk W. Bengé
Health Officer
