

Ice Accumulation Risk Today

What To Expect

There is a risk for light freezing rain showers and freezing drizzle today

The threat comes during two windows

- ✓ The first, conditional window comes this morning, if precipitation occurs it will likely be localized freezing rain showers near the coast
- ✓ The second, more likely window is later today and tonight as freezing drizzle develops in the foothills, where a winter weather advisory has been issued for parts of [New Hampshire](#) and [western Maine](#)

Locally heavy rain possible Thursday into Friday increasing the threat for flooding especially near the coast
